Just called Steve Austin of Navajo and left him a message and asked which date is best for him (17, 18, or 19). Will let you know when I hear back. Janet

Subject: Fall 2015 GKM LTM - Round 2: Objective A Sampling in NM and NN - November 17-19, 2015

After conferring with Maggie to hear she and Forrest are in agreement that we're outside the index period at this point for macros in NM and NN, and after speaking with START, we're going to put sediment and water sampling at the remaining 10 sites in the Conceptual LTM and the QAPP on the calendar for November 17-19, 2015.

This allows us to get our loaner USGS flow measurement ADCP instrument fully-functional for the deeper water channels in the San Juan River, enough time to deconflict schedules for R8 and R6 START, and gives all of our stakeholders the courtesy of at least a week notice before we

arrive. We will mobilize on the 16th and demobilize on the 20th.

Since Navajo Nation coordination looks to be the critical path, I'd like to ask Janet to inquire which one of those three days they prefer. We'll then be able to let NM know when we'll sample the seven sites discussed on the call on the remaining two days of field activity.

Thanks Monica for setting up the call and giving the green light.
